

# Neural Nets for Data Science

- Why neural nets?
  - Make “intelligent” decisions.
  - Reduces amount of feature engineering.
    - NNs figure out what is important.
- Ex. Image classification is based off of each pixels value as an input feature

# Neural Nets in Python

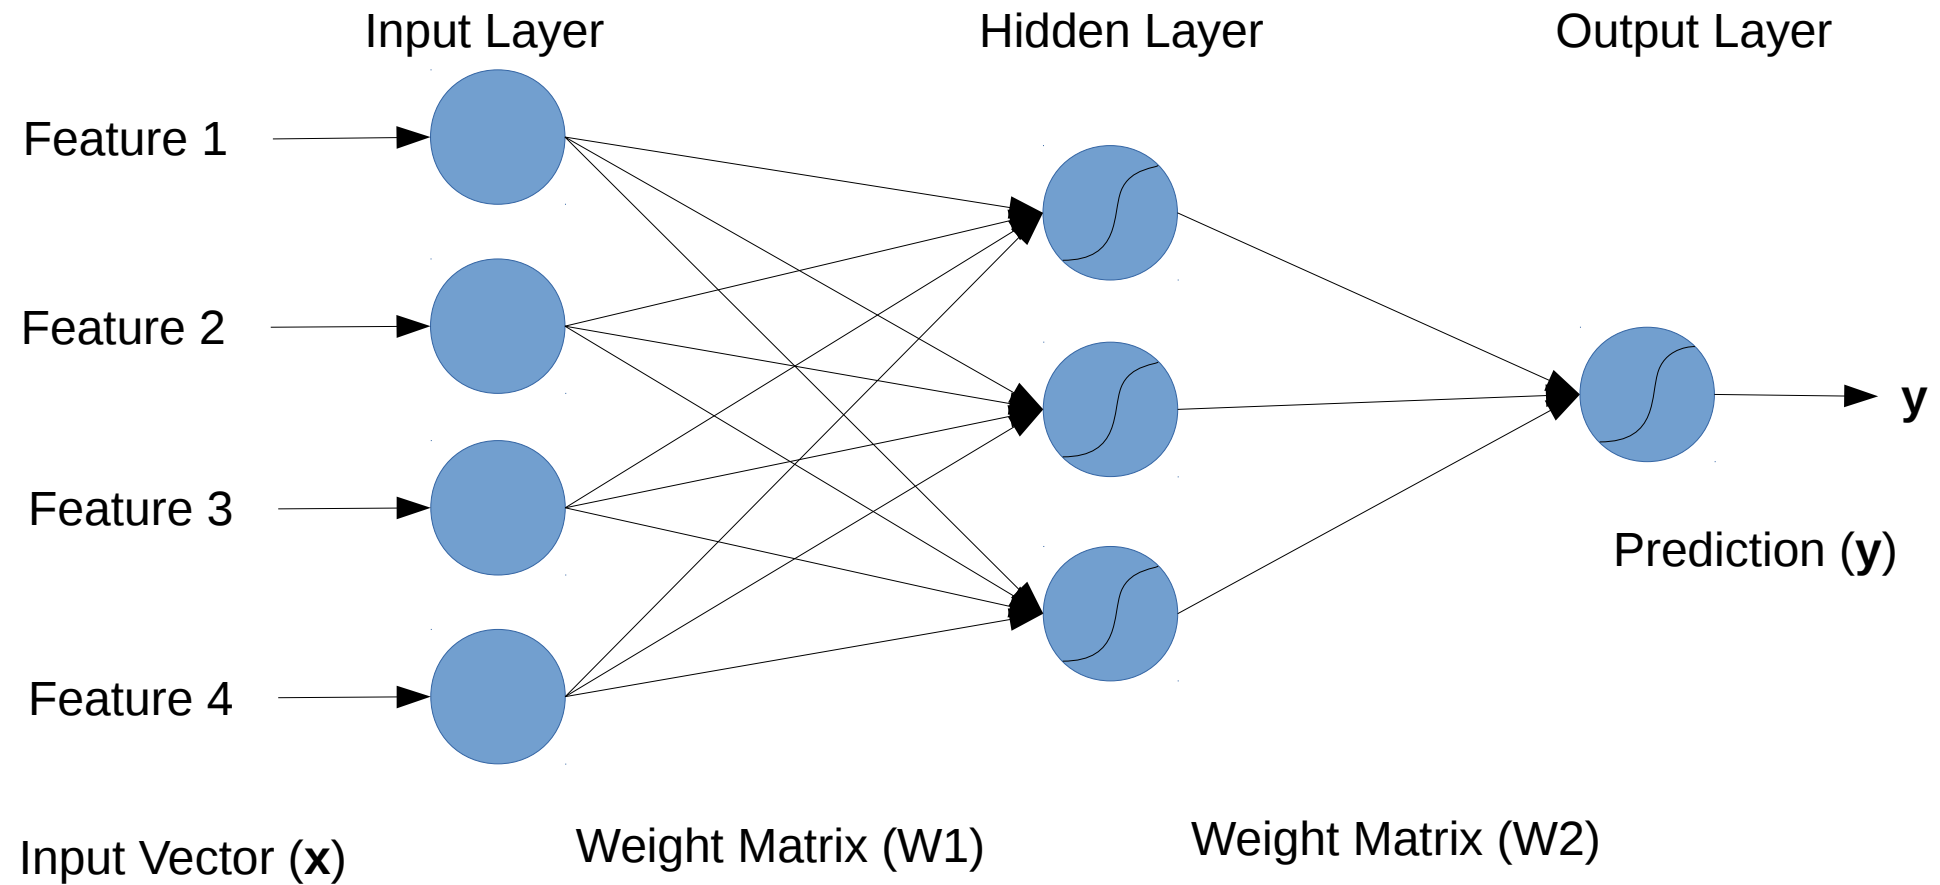

## Neural Net Libraries

High Customization (Explicit)	Easy API (Development Speed)
<ul style="list-style-type: none"><li>• TensorFlow</li><li>• Theano</li></ul>	<ul style="list-style-type: none"><li>• Keras</li><li>• Lasagne</li></ul>

There are many more!

# Neural Net Architecture

# “Hello World” of Deep Learning

- Hand written digit recognition
  - 55,000 training images
  - 10,000 test images
  - State of the art performance 99.8% accuracy!
